

Cartegraph Mobile

Portable Access
Consistent Data Entry
Paperless Technology

Get Rid of the **Clipboard**

Give your crews the ability to receive a work order, complete it, and close it out — all from the field. Cartegraph^{mobile} takes the capabilities and functions of your Cartegraph desktop applications and makes them fully accessible on handheld, wireless devices. Cartegraph^{mobile} makes vital data — such as asset locations, work order updates, and inspection histories — available at all times, giving personnel the tools to work quickly and accurately.

- » Cartegraph^{mobile} leverages the functions of today's handheld devices, allowing digital photographs and video images to be attached to work orders and inspection results.
- » Cartegraph^{mobile} utilizes easy to use dropdown menus to establish consistent and accurate data entry across your entire organization.
- » Cartegraph^{mobile} is a fully electronic interface that allows your organization to get rid of the paper and the inconsistent descriptions and bad handwriting that often goes with it.
- » Cartegraph provides ESRI mobile base maps, allowing mobile users to see assets and current location on a map for quick reference and planning.

Get to work on getting more done in the field.
