## **City of Arlington Wins Management Accountability Award**

DUBUQUE, Iowa —The City of Arlington, Texas has been named the winner of Cartegraph's 2011 Management Accountability Award, a national award recognizing superior communication, decision making and accountability in the realm of municipal management.

The award was presented at CONNECT 2011, an interactive learning and networking event for users of Cartegraph software held October 3-6 in Dubuque, Iowa.

Bob Ayensu, Asset System Administrator, accepted the award on behalf of the City of Arlington.

Arlington won the award for its innovative use of technology to provide the city's supervisory staff timely, relevant, and accurate information. Over the past several years, Arlington has worked diligently to tailor its Cartegraph work and asset management system to better fit the city's processes and workflow procedures. As a result, the city has become more efficient and detailed in the way it gathers and analyzes information, and uses it to make decisions.

Arlington was chosen the winner over three other finalists: Marana, AZ, Valparaiso, IN and Brookline, MA.

Also recognized at the event was the City of Denton, Texas, winner of the Workforce Efficiency Award, and the City of Golden, CO, winner of the Citizen Transparency Award.

### **About Cartegraph**

Cartegraph delivers flexible, integrated technology to governments that seek efficiency, accountability and transparency. From work, asset and infrastructure management, to citizen request and community development, Cartegraph offers solutions that help increase productivity, sustain investments and lower operating costs.
